

For sale!

seaQwest – a Najad 360

Finally my Captain has realized that it's time to let go. After 12 years together he found it better for me to continue my journey with another Captain and sail towards new ports.

It's been years filled with mutual love and care but the present situation is bad for both parties. I am urging to sail and he has not the time for it, so best for all is to find someone who can fulfil the role of an adventurous and caring owner.

So, if you are looking for a beautiful, high quality and sturdy blue water cruiser I'm the ideal sailing yacht for you. Experienced with more than 40 000 Nm under my keel and equipped like no other I can take you safely to wherever you wish. During the years I've been refurbished so much that it's only the main structure and wooden interior that is original.

1998 I had a brand new engine installed, an upgrade from 35 to 48 Hp. At the same time the entire rigging system was exchanged. A rig for a Najad 361 was mounted which makes me a very fast sailing boat compared with my fellow 360's.

4 layers of epoxy on the underwater body secure the hull for many years.

2006 to 2007 I was equipped with everything you need for sailing on the oceans. New Raymarine instruments and communication system, all electrical cabling refurbished and documented in drawings. Water maker, wind generator, SSB-radio and much, much more is installed to make life onboard safe and comfortable.

In Trinidad 2011 it was time for a new upgrade of the epoxy layers and at the same time I had a beautiful waterline sprayed that was more appropriate to my present weight.

During my entire life I've been maintained with love and care so a better kept old lady will be hard to find.

Right now I'm waiting for you in Biscayne Bay, Florida, a stone's throw from Bahamas and the Caribbean Islands.

Specifications

Boat Name

seaQwest

Hull

Builder: Najadvarvet, Sweden.....1985

Type: 360 № 12,

Hull: Fibreglass, Lloyds certified

Registration: Swedish Maritime Administration

Keel: semi long, lead, inside
